

IRELAND.

Ireland for the Irish—Home Political Economy.

There has existed for some months in Dublin a voluntary association, very humble at first, and not very powerful even yet, which promises to do more for that suffering island than all the political agitators of the last century have been able to accomplish. It is called the *Parent Board of Irish Manufacture and Industry*, and its objects are the naturalization and firm establishment of various branches of Manufacture in that country, and the concurrent training up of her children to Industry, Capacity and Efficiency. The objects and principles of this Association are clearly set forth in the following statement:

MANUFACTURE MOVEMENT.
The Parent Board of Irish Manufacture and Industry held its first weekly meeting at the City of Dublin, on Monday evening, 12th December ultimo.

James Plunkett, of James's-st., in the chair.
On the motion of Mr. Fraser, seconded by Mr. Brennan, the Secretary brought forward the following

ADDRESS TO THE CITIZENS OF DUBLIN FROM THE PARENT BOARD OF IRISH MANUFACTURE AND INDUSTRY.

FELLOW-CITIZENS: We address you once again, urging you to be the manufacturers of your own country to those of any other—however homely the one, however showy—however glossy the other. In this struggle, however, the people are not alone; the elevation, freedom, and happiness of your country are at stake.

"Many of you in times not long passed, in public resolutions, pledged your lives and fortunes to the cause of Ireland—liberty to speak—liberty to pray. Would that you had sworn on the public platform and around your altars to reject forever the slavery of foreign robes, which you would have secured to you more freedom, more wealth, more respect, more happiness and hope than any temporal you ever uttered."

On the eve of last Christmas we implored you, fellow-citizens, to take this vow. We wrote you letters, we sent you addresses—we waited on you by deputation—urging and compelling you to this great duty. Our exhortations were met by the illustrious few who reflect and feel. The cooperation of even these few has stirred many a hitherto idle loom—has put bread before many a hitherto half-starved child—has given life to many a hitherto dormant flow of a mother's tear. For behold the demand for Irish manufacture—the partial revival of Irish manufacture—have called into work almost every skilled hand in Ireland."

No blood has been shed—no patriot imprisoned or exiled in this movement: yet part of the patriot's aspirations have been realized. A portion of our nation's wealth has been reallocated to the right hand, and the people have been instructed and employed. Public confidence has been partially restored. New branches of industry have sprung up. There has been more trading, and the people have been more benefited. There have been more goods produced in Ireland, and more industry and economy practiced, and the merchants have higher dividends. Increased profits have, in consequence, followed.

Now, fellow-citizens, let us follow up this good work. Let us once again to the great enterprise. Heed not the sophists who tell you "it was best to buy in the cheapest market." The cheapest market for the Irishman is the Irish market.

"Let us examine the market. Two hares are presented to you of equal price, to purchase, say 12s. 6d. each—one is foreign, the other Irish. It is possible the foreign hare is more exquisitely finished inside with gauzy silk and golden letters. You are caught by the glittering bait, and you purchase the foreign hare. Very well. What becomes of your money? Eleven shillings of the 12s. 6d. are sent out of Ireland forever. It goes into pockets of foreign workmen and their wives, foreign capitalists and their wives, and never by any chance will expend one penny of that money in this country, and you, who have toiled for that 12s. 6d., perhaps a whole week, now find it way, abstract it from your country's wealth, and send it to the great enterprise. Heed not the sophists who tell you "it was best to buy in the cheapest market." The cheapest market for the Irishman is the Irish market."

"On the other hand suppose you were to wise to let us take only one hare, and that of the foreign hare—suppose you bought the *Irish-made hare*—eight or nine shillings of its price would flow out upon perhaps your very neighbors—people who would not do for you, and who would not very next Saturday buy something that you make, or that you sell. Here you see the whole philosophy of buying Irish manufactures. But pursue this great problem further."

"The cotton and silk of which the hat is composed has cost but 4s. 6d., the rest of the price is wages and profits. That is about eight shillings. These eight shillings, however, are not sent out of the country, but are sent around you, and will yield a trading and laboring profit every time they are turned, of twenty per cent, or is 8s. each time. That would be a profit of 9s. 4d. in the year. At the end of the year the profit of 9s. 4d. is 9s. 4d. At the end of two years, upon the same principle—that is, if any one who partook of any portion of the money, laid it out again on Irish manufactures, and so on, and so on, at the end of three years the accumulating growth of the profit of your Irish-made hat, which you purchased for 12s. 6d., would amount to 25s. 7s. 6d. At the end of four years, it would amount to 35s. 7s. 6d. At the end of five years, it would amount to 45s. 7s. 6d. At the end of six years, it would amount to 55s. 7s. 6d.
